WE ARE THE BOOST YOU NEED

We use all the power of the internet to leave a virtual footprint, build an audience and generate conversions.

We specialize in delivering valuable content to your brand and distributing it across multiple digital channels, including social media, email marketing, SEO-driven content, blogs, and even ad campaigns.

WHY DIGITAL MARKETING?

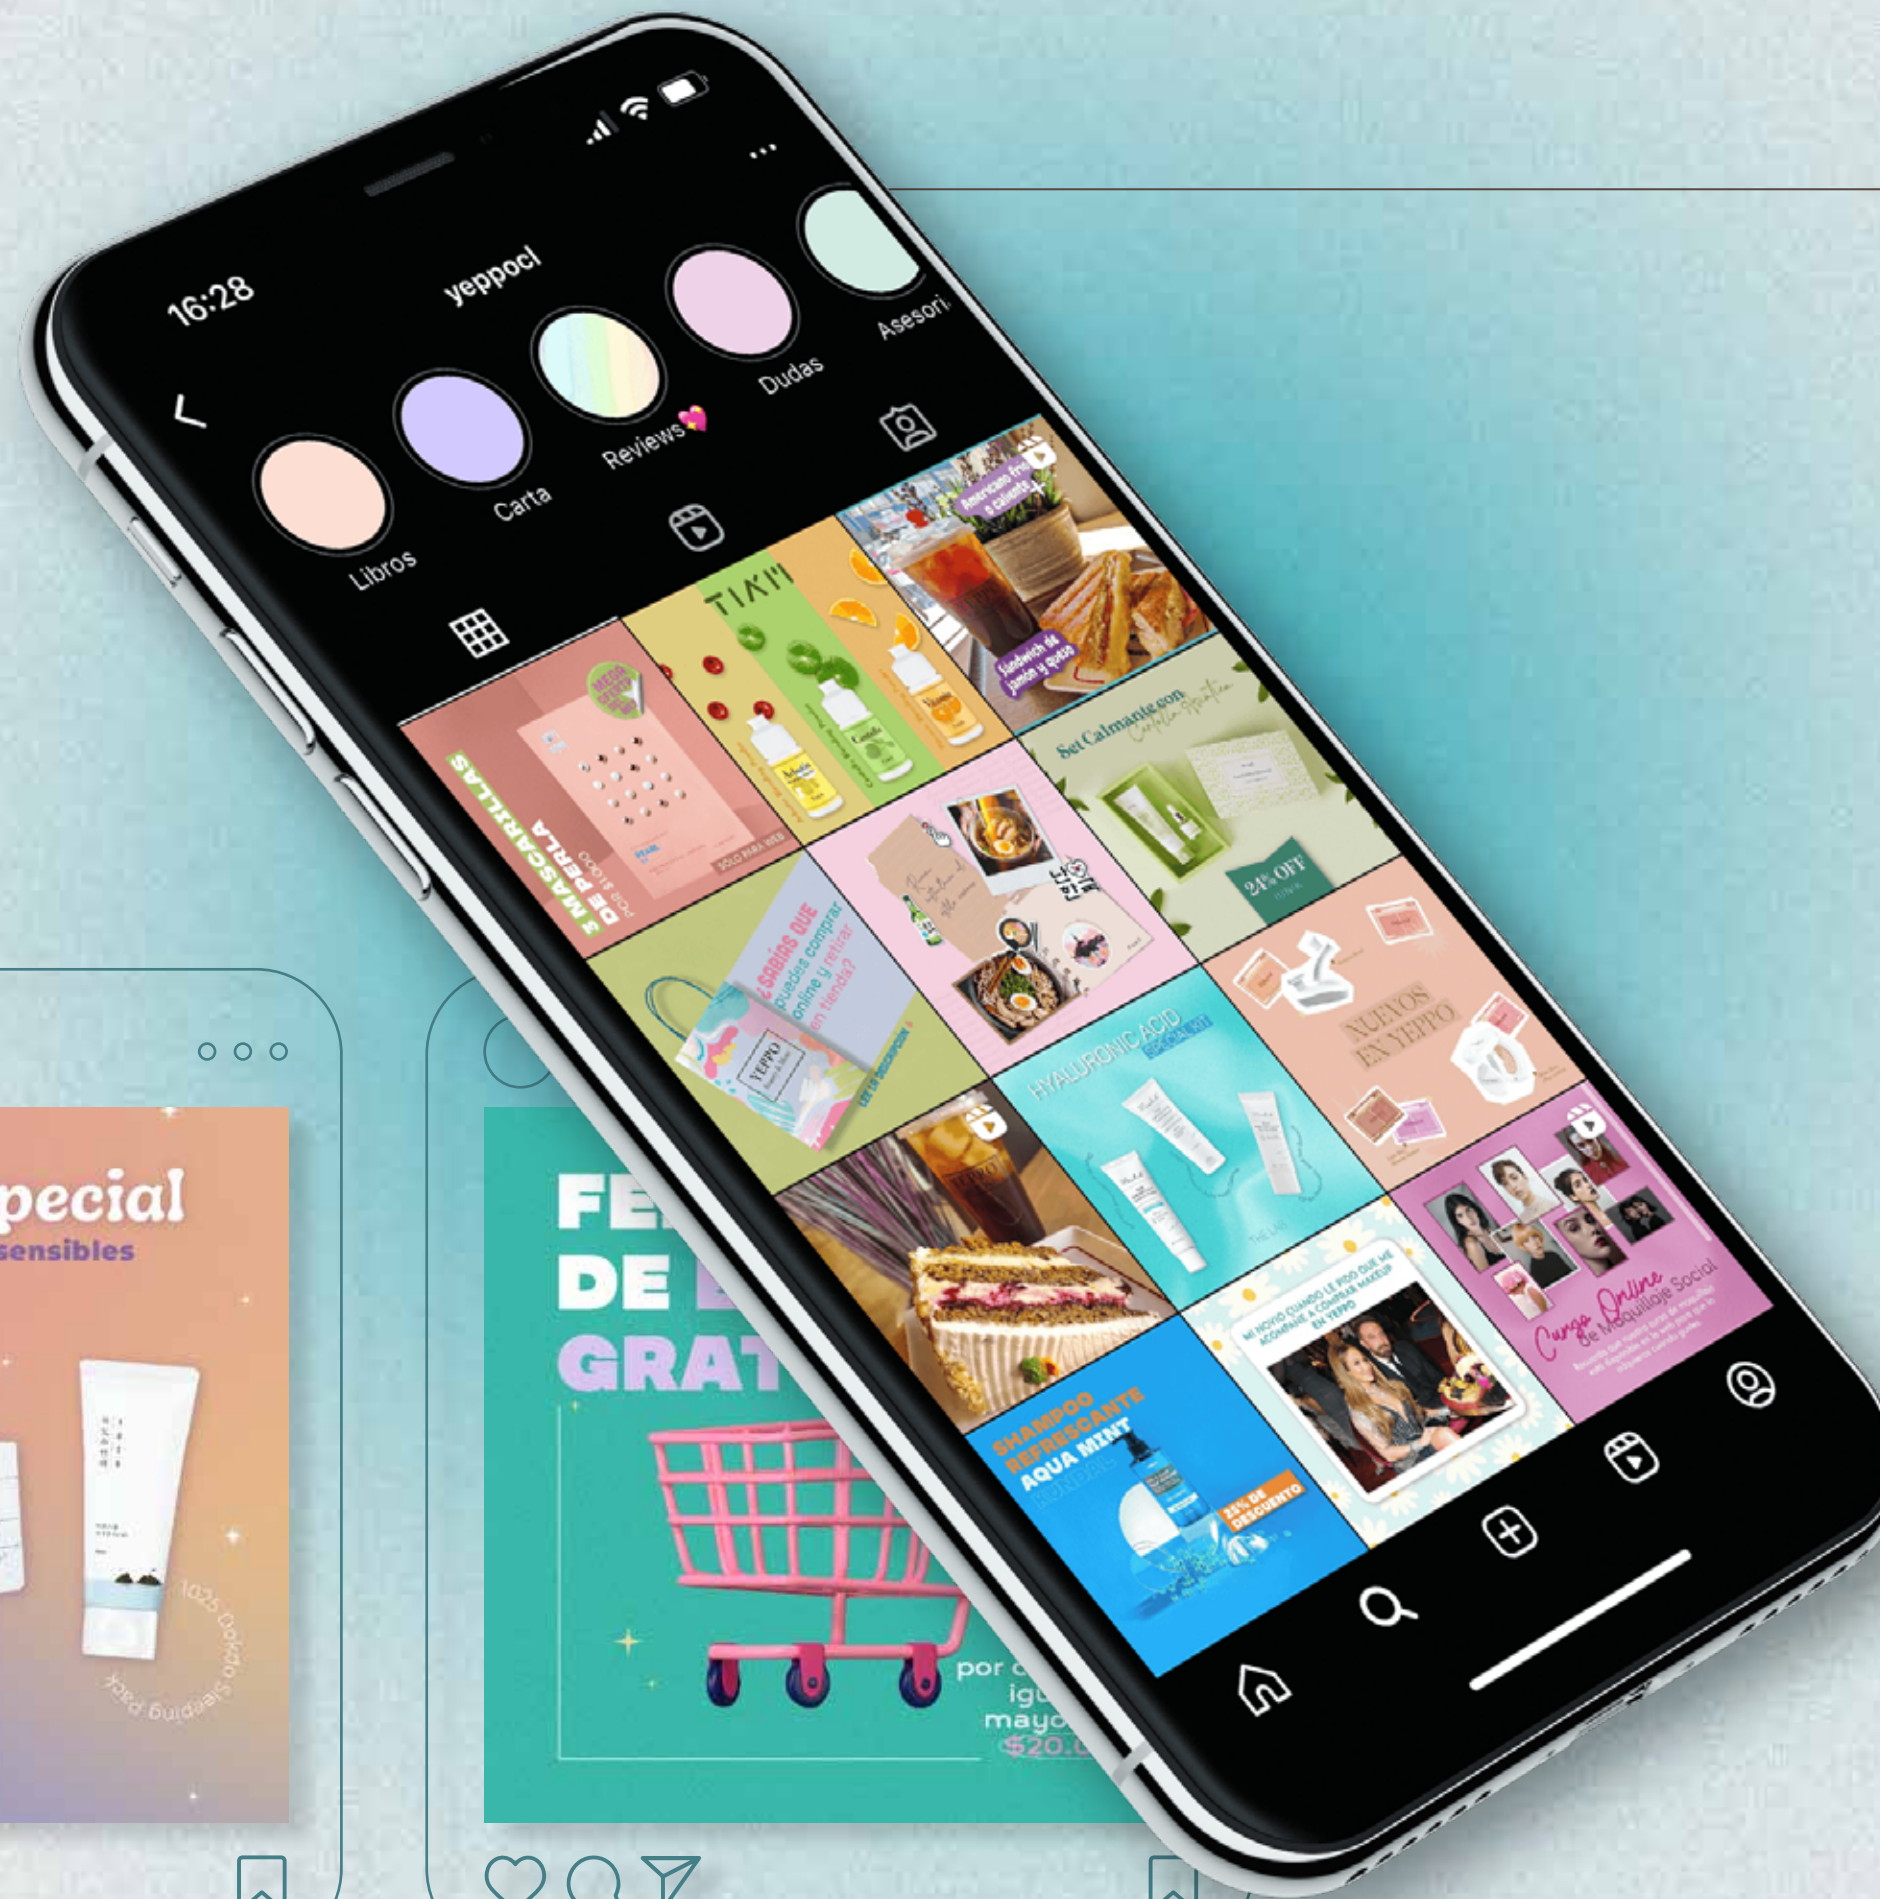

Currently, 93% of purchase decisions begin online. That's a big number, right? This figure underscores the importance of having a strong digital presence.

However, simply having a presence is not enough. Digital marketing allows you to identify your ideal target audience within this vast digital landscape – a group of people who share common interests with your brand and who will be thrilled to discover you.

How did we raise \$3000 in a month?

We launched a comprehensive marketing campaign that included creating press releases and media kits sent to over **50 local media outlets**, targeted ads, and a strong social media presence to expand the campaign's reach and impact.

Toley Ranz offers resources and programs to teachers and professors to help combat bullying. Today, the **Toley Ranz Stop Bullying** program is featured in Arizona's leading bookstores.

We conceptualized and developed a book that combines educational games with the values of the foundation.

Currently, the book is available in local bookstores in Arizona and can also be downloaded using this QR code.

Identity and Profitability

- Branding
- Platform Development
- Business Model

For **Nuria's** project, our initial focus was on creating a strong brand identity and a platform that reflected their vision and values.

- nuria - nuria - nuria - nuria - nuria - nuria -
ria - nuria - nuria - nuria - nuria - nuria -
a - nuria - nuria - nuria - nuria - nuria -
a - nuria - nuria - nuria - nuria -

With this brand identity in place, we established a profitable and scalable business model for the platform. Our approach centered on creating a subscription model and a transactional commissions system that would benefit both therapists and users alike.
